Metabolism Platform Seeding Grants 2025

Seeding Grants will be provided to early career researchers to perform one defined breakthrough experiment that sheds new light on metabolic processes linked to human health. Projects addressing areas such as, but not limited to, **metabolic tracing**, integration of metabolomic data in **multi-omics** approaches, **biomarker discovery** or **hypothesis-driven** studies in **clinical samples**, and metabolic measurements in **whole organisms** are especially welcome.

The Metabolism Platform of the Medical University of Vienna awards 6 seeding grants of 5,000€ each to support innovative well-defined projects in the field of metabolism.

Eligibility

- Applicants must be early career researchers affiliated with the Medical University of Vienna.
- Eligible categories:
 - PhD students
 - Postdoctoral researchers
 - Group leaders who have established their research group at the Medical University of Vienna within the past 12 months.

Assessment Criteria

Applications will be evaluated by the Metabolism Platform provisional organizing committee according to:

- **Scientific excellence** and **metabolic relevance** of the proposed experiment.
- **Potential for collaboration** within the Medical University of Vienna.
- **Planned use of core facilities** at Medical University of Vienna.
- **Expected impact** of the outcome on advancing metabolic research (e.g. catalyzing data generation for external funding applications, enabling completion of studies close to publication).

Application Guidelines

- A one page application (see form) and a short CV must be submitted using the **application form provided**.
- The project description should clearly outline the **innovative concept**, the **specific experiment**, and its **expected impact and significance to metabolism research**.
- Applicants should highlight how their project will foster collaborations and integrate Medical University of Vienna's **core facilities**.

Submission

- Please send your completed application form as a **single PDF file** named **Surname_Name.pdf** by **17 November 2025** to: metabolism-platform@meduniwien.ac.at
- For more details please check Homepage [Forschungsbereiche | Forschung an der MedUni Wien](#)
